The world's fastest test for detecting
Legionella pneumophila sg1

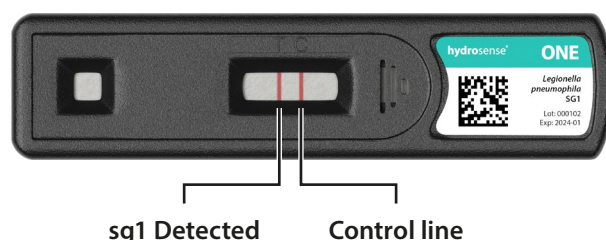

Hydrosense ONE Ultra Legionella Industrial Kit

Our Hydrosense Ultra Legionella Industrial kit is ideal where repeated sampling of the same water outlet is required. It can detect ≥ 100 CFU/L and is our most sensitive multi-test kit for detecting *Legionella pneumophila* serogroup 1 (sg1), the cause of around 90% of Legionnaires' disease.

Simply attach our outlet adaptor and leave it in place ready for the next scheduled testing according to your water management program.

An excellent choice for territories and industries where more stringent action levels are required. Recommended for high-risk areas such as industrial cooling towers, large water systems in hotels, healthcare, residential and commercial properties.
