

PRO ULTRA Legionella Test Range

Our new innovation is just as flexible as our current test but now detects *Legionella pneumophila* serogroups 1-15, which cause over 97%* of Legionnaires' disease.

The kit uses our innovative filter technology which isolates bacteria, and distinctly identifies the presence of serogroup 1 on one test line and serogroups 2-15 on another.

It's the ideal test for high risk areas such as cooling towers, water tanks, fountains, showers, sinks, spas and pools.

	Water Test	Industrial Kit	Swab Test
Detection	<i>Legionella pneumophila</i> serogroups 1-15		
Test time	25 minutes		
Sensitivity	100 CFU/L with action levels at 1000 CFU/L and 10,000 CFU/L		200 CFU per swabbed area
Includes	1 test	5 tests	1 test
Part number	500500	500501	500502

*ECDC reported cases. A1832
