The world's fastest test for detecting
Legionella pneumophila sg1-15

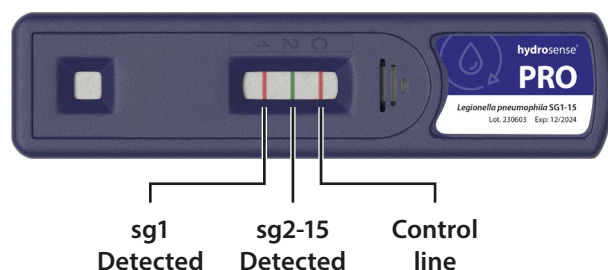

Hydrosense PRO Ultra Legionella Industrial Kit

Our Legionella Industrial testing kit is perfectly designed for water outlets needing repeat testing and includes everything needed to complete 5 tests.

It uses our exclusive Hydrosense filter technology, enabling the isolation of bacteria through conventional plumbing connections (compatible with US ½ inch NPT and ¾ inch BPT fittings). The pipe fitting also conveniently connects directly to standard shower hoses.

Ideal for use in higher risk areas with water sample points that require frequent monitoring, including industrial cooling systems, extensive water networks within hotels, healthcare facilities, residential buildings, and commercial premises.
